

SELF-LEARNING

Science of GLP-1 RA

Explore the science of GLP-1 RAs and understand the basics of its placement in treatment continuum of type 2 diabetes

Self Based Learning:
1/10 Self paced e-learning modules

Time: 15 mins

Content: 3 videos & 1 quiz

Intended for: GPs, primary care physicians, Diabetologists, Endocrinologists

Therapy area: Diabetes

Difficulty Level: Basics

PAGE NAVIGATION

Module 1 : Science of GLP-1 RA

Video 1 : GLP-1 RA - Mechanism of Action

Quiz : Self Learning Assessment

GLP-1 RA Masterclass Webinar

Learning objectives

What will you learn?

- ✓ Understand the function of GLP-1 in metabolic disease and the role of GLP-1 RAs in weight management and glycaemic control
- ✓ GLP-1 RAs are suitable across the continuum of metabolic disease1-3
- ✓ GLP-1 RAs have multi-factorial benefits
- ✓ Type 2 diabetes management: How GLP-1 RAs fit in

Module 1 : Science of GLP-1 RA

Understanding GLP-1: An Incretin Hormone Overview

This e-learning module explores GLP-1, an incretin hormone encoded by the proglucagon gene. It details how GLP-1, produced in response to food intake, plays a key role in insulin secretion and is regulated through the GLP-1 receptor.

Video 1 : GLP-1 RA - Mechanism of Action

GLP-1 RA Mechanism of Action Video

This e-learning module explores GLP-1, an incretin hormone encoded by the proglucagon gene. It details how GLP-1, produced in response to food intake, plays a key role in insulin secretion and is regulated through the GLP-1 receptor.

Quiz

Science of GLP-1 RA

In this interactive quiz, test your knowledge on the Science of GLP-1 Receptor Agonists and reinforce your understanding of this crucial aspect of metabolic physiology.

4 QUESTIONS

ATTEMPT 1 / 5

Test your Knowledge

Test your knowledge across a wide range of topics and see how many questions you can answer correctly. Remember, there's always something new to learn!
